

We'll grow with you.

Durable goods manufacturers look to Monoflo for bulk containers, pallets and a wide range of tote options. For over 40 years, our breadth of high quality products have outperformed competitive products—test after test, product after product. Ongoing product development yields innovations like higher strength-to-weight ratios and longer useful product lifecycles. And, custom containers are an integral part of our plan—we aim to build relationships that last. So, think of Monoflo as a partner for growth. We'll be by your side for the long haul.

Bulk Containers

- High pressure injection molded
- Unique and proven welded base technology improves durability
- Best in class strength-to-weight ratio
- All-plastic ergonomic latches and hinges won't rust and are easy to repair
- Large labeling areas on all four sides
- Low total-cost-of-ownership

Foldable Containers

- Feature-rich options like access doors
- Freight savings for return freight
- Customizable for many applications

Stackable Pallets

- High pressure injection molded
- Welded construction for added strength and reduced weight
- AIAG compatible footprints
- Available with seat belt and top cap options

Straightwall Containers

- AIAG footprint containers
- Available in 1215, 2415, 2422 footprints
- Ergonomic handles
- Straightwall design ideal for custom dunnage applications

Industry-Leading Innovation: Bulk Containers

Monoflo's bulk containers are built to perform. With hundreds of thousands of containers in service, the Monoflo bulk container is the proven choice.

Our containers are engineered for strength, 100% recyclable, repairable and competitively priced. No other bulk container compares.

Proven Performance: Our unique combination of the latest high pressure injection molding technology and our tested and proven welding process yield the best strength-to-weight ratios available.

Sustainable: Our bulk containers are 100% recyclable. Additionally, with no fiberglass or metal reinforcements, our bulk containers weigh less than others which means fewer raw materials are used.

with open access door

Durable: Monoflo's unique "I-Beam" construction is a two-piece welded design that makes the strongest, most durable base in the industry.

Repairable: If a break occurs, every piece of Monoflo's bulk containers is repairable in the field in a matter of minutes.

Cross section of our I-Beam welded technology which increases base strength by up to 40%

Two footprints. Varying heights. Ready to work.

Bulk Containers

- Best in class strength-to-weight ratios
- High pressure injection molded
- Unique, welded base provides structural integrity that outperforms the competition... Test after test
- All plastic, ergonomic latches
- Strong, durable plastic hinges allow the access door to drop flush against the container
- Smooth, reinforced fork openings for easy access
- Highly visible, flat labeling area on all four sides
- All-plastic hinge line makes sidewall replacement and repair easy
