

Poly (Box) Trucks

For More Information: 866-333-0728

Bayhead Poly-Trucks are available in 19 sizes, molded in heavy-duty polyethylene. Molded vertical ribs in medium sizes provide superior rigidity & strength. Optional lids for many sizes help protect contents. Most trucks are available in a variety of colors for no extra cost.

Molded polyethylene bodies are secured to an all-welded angle-iron dolly by bolting through the bodies. 5" casters are welded in a corner pattern for sizes 10 through 80 bushel. Sizes 4 through 9 bushel use 3" casters. Note: Standard units are not leakproof unless requested when ordering.

Poly-Trucks - Options

LIDS:

Our **Standard Telescoping Lids** are available for sizes ranging from 4-bushel to 20-bushel (excluding 9, 15&17-bushel).

Lids may be hinged across the center to allow opening with lid in place.

Janitorial Lids are hinged across the center and also include a molded "well" for supplies. The handle also holds rolls of paper towels or rags. The lid may be totally removed for full access to the bin. Available for 10 to 20 bushel truck sizes (excluding 15 & 17 bushel). Please note that janitorial lids available in gray only.

UT-18 & PBL-18
"Standard" Lid

UT-16 & BLN-16
"Janitorial" Lid

HEAVY-DUTY FRAMES:

Made for extreme load conditions. All-welded steel frames encompass the molded body to provide 1200 to 2000 pound weight capacities. Frames are available for sizes 12-bushel to 80-bushel. 6" heavy-duty removable casters are mounted in a square pattern. Steel frame extends up under the rim to provide superior durability. Watertight.

HD-18

ELEVATED FRAMES:

Elevated frames are offered on our 4-bushel to 10-bushel units. The tubular steel frames raise the poly-body about 18" off the floor to provide easy access without bending. Great for laundries, libraries, stock rooms, etc.

CUSTOM STYLES AND SIZES:

We specialize in offering the exact size and style truck that will work best for your application. We build our molds in-house, allowing you to incorporate the features you require in a time frame that works for YOU. Please contact us for further information.

EL-8

UT-30

STENCILING:

Lettering from one up to all four sides.

DRAINS

Threaded fittings welded to the wall or bottom of the bins. Accepts plugs, spigots or other plumbing.

Close-up of 1" male threaded fitting

CASTER PADS

Pads allow casters to be quickly removed and replaced if damaged or worn out.

PLATFORMS

Floating platform is supported by covered springs to keep contents within easy reach.

FORK POCKETS

Steel pockets are welded to special tubular steel frame to allow unit to be dumped using standard lifters/dumpers. Note: Fork Tubes are required for use with rotating forklifts.
